Preliminary Amendment
Divisional Application

This is a division of Application Number 09/071,878 filed on May 4,1998.

1. Substitute claims 6-10 in place of claims 2-5.
2. Substitute Fig.7 in place of Figures 1- Figures 6.
3. New specifications have been written to be substituted in place of original specifications. Original specifications are on file at PTO.
4. The divisional application is being filed as a process or method to enhance the equity of a business entity. The financial product or instrument formed by the process or method is a new use for an old and known item. The financial instrument formed is called a Share Bond.
5. The independent inventor is still classified as a small entity and this status has not changed.
6. The invention claimed is not in the field of computer technology as was the original application.
7. The sole inventor of the claimed invention is Durham Russell Maples. Herman Russell Anderson was named as a co-inventor in the original application and that remains true for that application. Herman Russell Anderson has been dropped as an inventor for this divisional application.
